

Website Cookies Policy

Our website, like many websites, uses cookies to run the content management system and to collect anonymous visitor data. In keeping with current legislation, we are making users more aware of these cookies and providing links to help visitors decline or remove cookies.

What are cookies?

A cookie is a small file of letters and numbers put on your computer as part of your use of a website. More details about cookies are available from a number of online sources including [All About Cookies](#).

Why do we use cookies?

Cookies are integral to modern websites. They allow us to distinguish visitors from each other and (anonymously) record the traffic to the website. This helps ensure a good user experience, and the data is valuable in assessing and improving the website.

Which cookies do we use?

We use the following cookies on this site:

Session cookie (reflect). This cookie is 'strictly necessary' for the site to function. This is a session cookie that is integral to the code that runs the content management system. It only lasts for the duration of a user's visit to the website. A web browser normally deletes session cookies when it quits.

Google Analytics cookies. We employ:

- utma
- utmb
- utmz
- utmc

These are performance cookies. We collect them anonymously and assessing the data they provide allows the site to be improved. Google provides [details of all the cookies used by Google Analytics](#).

By using the website, you agree that we can place these types of cookies on your device.

Opting out, removing and managing cookies

If you are uncomfortable with the use of cookies, most browsers now permit users to opt-out/block them. This varies from browser to browser – please see 'Managing cookies' below.

However if you choose to opt-out/block cookies you may not be able to access certain sections of the site, and/or functionality may be impaired.

Alternatively, you may wish to delete the cookies from your system at the end of your visit to our site.

Managing cookies

You can change your browser settings to manage cookies – including opting-out/blocking. The website About Cookies gives [browser-specific instructions on how to manage cookies](#). If you would like to [prevent all Google Analytics cookies being set](#), you may want to install the Google Analytics Opt-Out Browser Add-On.

Please note that opting-out or blocking cookies may impair your use of this (and other) websites.
